

VIS-BDE

Violin Sensor

Our company make this bridge sensor to eliminate all adjustment problems. It is handmade pre-adjusted by extremely high accuracy and comprises the latest innovation. It is manufactured to be noise-free and able to match all Amps and consoles. Perfectly balanced, satisfying even the most demanding customer with a natural undistorted sound. In fact the sound comes from the strings and the body vibrations. Reproduce a sound with full harmonics and a high output signal. Comes with carpenter 1/4 jack for secure connection.

Install and remove the sensor easily any time.

Pickup installs under the bridge on the violin body, between the bridge's feet. Press down the foam rubber and insert or remove in straight direction.

TIP

** If required, customize the sensor height. A foam cutting Knife with a suitable, new blade and a profiled grip can be used to do straight cuts on the foam rubber.

In case of difficulty, the installation recommended to be done by an experienced technician.
