SENSOR

Natural sound

UK - B

FEATURES - INSTRUCTION

The very Ukulele instrument TAP sensor constitutes the latest technology in the progress of electronic musical instrument's sensors. They are handmade pre-adjusted by extremely high accuracy apparatus. Perfectly balanced, satisfying even the most demanding customer with a natural undistorted sound. Shielded to avoid unwanted microphonics. Matches to all inputs of consoles and amplifiers.

You can install the sensor adjacent to the bridge of the organ. Or to any other place along the organ's body according to your personal preference of sound, volume and hue.

The installation of the sensor is an easy process using the special adhesive tape which is already attached to the back of the device. Comes with an 1/4 female jack for external mounting. The external jack is mounting with self-adhesive clamp.

Technical Information:

Sensor Height: 2.5mm
Sensor diameter: 20mm
Impedance: High ohmic

Comes in 5 colors
